SKILLS

- HTML
- CSS
- Bootstrap
- Javascript
- Node.js
- Express.js

EXPERIENCE

Receiving Associate

Corona, CA

Hajoca Corona/ 12-2019 to Current

Currently work for Hajoca plumbing in the warehouse doing receiving. My main duties are inspecting incoming material, counting that material, and putting the material onto the shelves. I also do returns and cancellations from customers. I have trained two people while working for hajoca. One I trained for the shipping team and another I trained on eclipse to do the returns and cancelations. To help train both individuals I created a PDF file of how to help them with the specific job duties.

Correctional Service Assistant

Orange County, CA

Orange County Sheriffs Department/ 03-2013 to 05-2021

While working in custody for the Orange County Sheriff's Department where I maintained security for inmates. My main duties were to do hourly checks, log those checks, and conduct inmate counts. During my time with the sheriff's department I trained multiple new employees and had to write daily performance evaluations on their abilities.

EDUCATION AND TRAINING

Certificate: Full Stack Web Development

Trilogy @ University Of California Irvine Expected in May 2021
Irvine

High School Diploma

Santiago High School Jun 2011

Corona, CA

PROJECTS

* **BusyParentScheduler** | github.com/clintrizzo/BusyParentScheduler |

<https://kjwallac.github.io/BusyParentScheduler/calendar.html>

- This app was created to help individuals schedule their busy days being work, personal life, family life, ect.
- My role was to create the frontend of the calendar with the HTML and the CSS. I also created the weather portion that gives an updated weather condition for the city they are in using Javascript and the weather API

- CSS, HTML, JavaScript

* **Fantastic-Fitness-Tracker** | github.com/clintrizzo/fantastic_fitnessTracker | <https://fantastic-fitness-tracker.herokuapp.com/>

- This app was created for the user to allow the user to create an account to begin keeping track of their personal workouts
- My role for this project was the frontend and creating the specific routes for each page. I created an authentication using passport.js
- Handlebars, CSS, JS, server.js, and routes
